

TM-F Speakerbox

- » USB Intercom module for ergonomic hands-free bidirectional voice communication

FEATURES

- » add-on module or standalone device (if a Tipro controller is integrated in)
- » combination of a USB audio device and an HID keyboard (plug&play operation with generic drivers)
- » stereo loudspeakers and goose-neck microphone
- » separate alert/alarm audio output
- » connection for an external analogue headset and handset
- » digital control over hands-free and optional headset/handset
- » incremental encoder (endless potentiometer) for volume control
- » three-colour bar-graph display as VU meter and/or volume indicator
- » six programmable keys with LED indicators for mode control and volume adjustment
- » analogue front-end designed to meet narrow-band telephony standards
- » programmable signal processing includes ambient noise suppression (noise gating), signal compression and limiting
- » integrated acoustic shock protection
- » optional echo-cancellation circuitry with digital signal processor
- » optional analogue audio interface (instead of USB) for legacy systems
- » powered from FREE+ 15 or BeFREE via internal Tipro Power Bus
