

Product Change Notification

October 2025

Affected products:

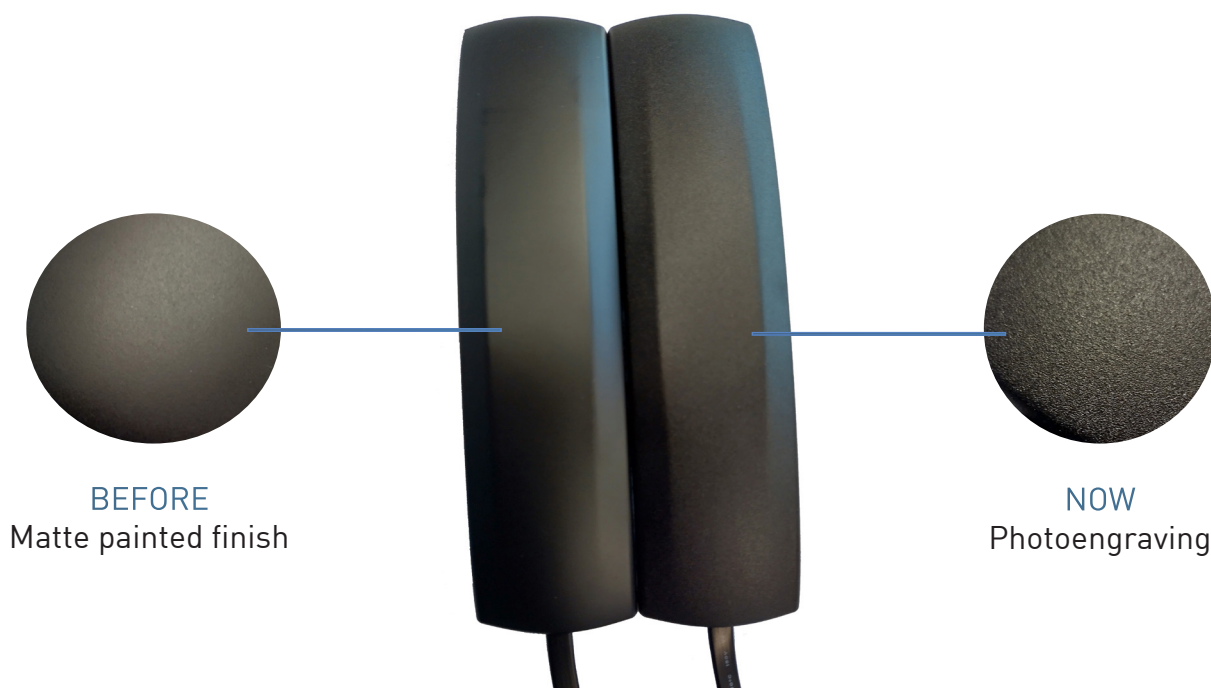

- **Handset** (Ordering Codes TM-Hxx-xxx, TMC-xHx, BF07-xxx)

Updated design Handset Top Cover

The finishing of the Top housing of our Handset has been changed from a matte painted finish to photoengraving, just like the rest of the handset.

The aim is to offer less environmental impact, a better scratch resistance and more controllable quality of finish.

Apart from a slightly different visual design, all characteristics are the same as with the current Handset. The change does not impact the user experience and no setting changes are needed compared to current installations.

The ordering codes and part numbers will remain the same, the version printed on the product label will be incremented after the dot.

The phase-in starts in October 2025.

If you have any questions, please contact either our sales team at sales@tipro.si or our support team at support@tipro.si

Sincerely,
Tipro Marketing & Sales
